## i Changing times — a time for change

- 103 Hippocampal type I and type II corticosteroid receptors are modulated by central noradrenergic systems
- 113 Noradrenergic mediation of the memory-enhancing effect of corticotropin-releasing factor in the locus coeruleus of rats
- 125 Differential impact of naltrexone on luteinizing hormone release during single versus repetitive exposure to restraint stress
- 135 Serotonin does not mediate the adrenal catecholamine-releasing effect of acute lithium administration in rats
- 145 Effects of intravenous and oral dexamethasone on selected lymphocyte subpopulations in normal subjects
- 153 Sexual behavior in adolescent and adult females with congenital adrenal hyperplasia
- 171 Menstrual synchrony in female couples
- 179 Psychological aspects of premenstrual syndrome I: cognition and memory
- 189 Psychological aspects of premenstrual syndrome II: utility of standardized measures
- 195 Serum levels of androgens are higher in women with premenstrual irritability and dysphoria than in controls
- 205 Pulsatile LH secretion in women with premenstrual syndrome (PMS): evidence for normal neuroregulation of the menstrual cycle
- 215 Major depression and subclinical (grade 2) hypothyroidism
- 223 A double-blind, placebo-controlled study of the effect of imipramine on TRH-induced urinary urgency in healthy men
- 231 Clinical evidence for thyroid dysfunction in patients with seasonal affective disorder
- 243 Melatonin, cortisol and prolactin response to acute nocturnal light exposure in healthy volunteers
